• Klára Csillagné Tóth •

Junior Frontend Developer

I have decided to study in order to start my career as a developer. Problem-solving and creative thinking are among my strengths, and I pay great attention to details to deliver high-quality work. My goal is to further enhance my programming skills and professional experience. I am proud of my achievements so far, but I am also open to learning and growth. Progress and challenges motivate me, I have twenty years of experience in computer design, graphics, and typographic representation, so the visualization is very important to me.
